

Puraflo[®]

Peat Fiber Biofilter

The Puraflo peat fiber biofilter system is the most versatile and reliable treatment system on the market. The system is green-friendly and uses little to no energy. Puraflo is odor-free and operation is very simple. Puraflo's flexibility coupled with performance is unmatched in the industry.

Applications

Single family homes

Multi-family homes

Communities

Small commercial operations

Intermittent use (e.g., vacation homes, campgrounds)

Churches

Schools

Why Choose Puraflo?

- Modular design assures flexible phasing options
- Completely odor-free
- Very low or no power requirements
- Seasonal or intermittent use compatible
- Factory assembled
- P150N models certified to NSF/ANSI Standard 40
- High level pathogen and nitrogen removal
- Green solution, based on passive biofiltration principles
- Unique peat fiber with high lignin content provides for a longer media life
- Minimal system maintenance with no annual fluffing or raking of the peat fiber media
- Optional remote monitoring using telemetry

Most Versatile Treatment
